

Elections and Electoral Systems

Democracies are sometimes classified in terms of their electoral system.

An **electoral system** is a set of laws that regulate electoral competition between candidates or parties or both.

Elections are increasingly used to fill legislative and executive offices around the world.

185 of the world's 193 independent states now use direct elections to elect people to their lower house of parliament.

Electoral integrity refers to the extent to which the conduct of elections meets international standards and global norms concerning 'good' elections.

These norms and standards are usually set out in treaties, conventions, and guidelines issued by international and regional organizations.

Violations of electoral integrity are referred to as **electoral malpractice**.

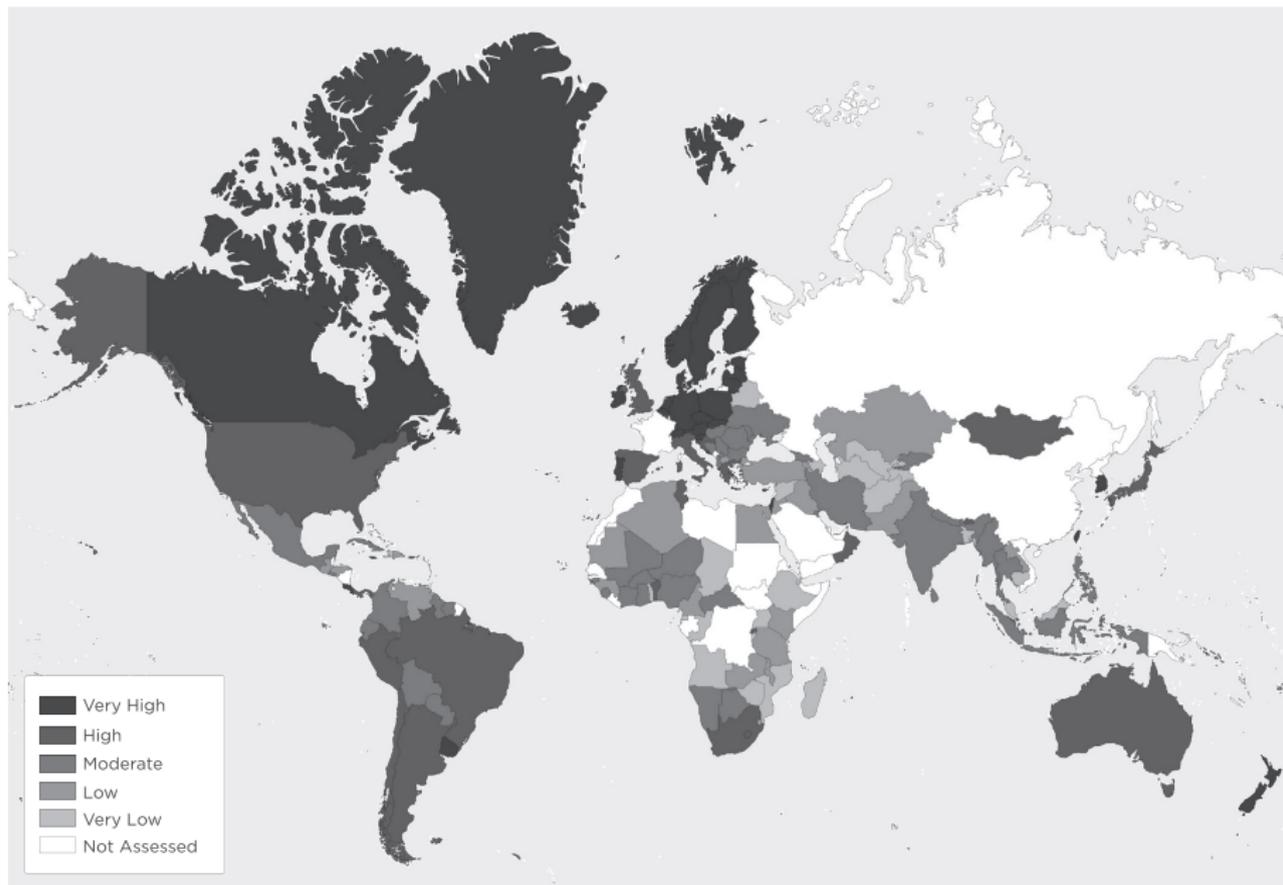

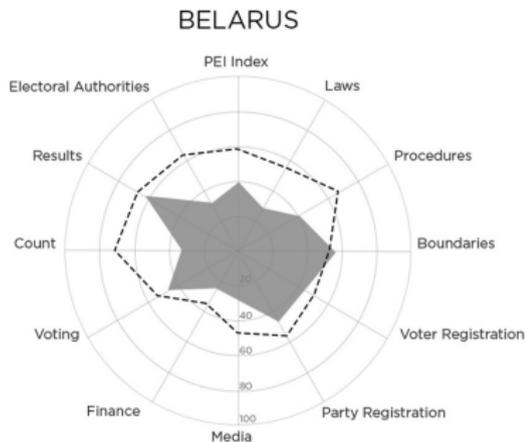

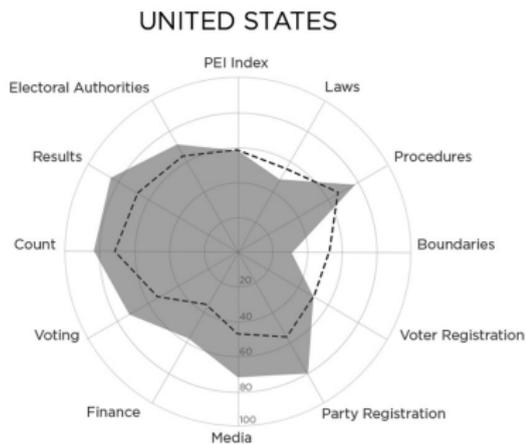

FIGURE 13.2**Electoral Integrity in Four Countries**

Democracies tend to have higher levels of electoral integrity than dictatorships.

There is variation, though, among both democracies and dictatorships.

Electoral integrity is influenced by:

- Domestic structural constraints
- The role of the international community
- Institutional design
- Electoral management bodies

Two strategies to identify election fraud:

1. Election monitoring
2. Election forensics

TABLE 13.1**Benford's Law: The Frequency Distribution of First and Second Digits**

0	1	2	3	4	5	6	7	8	9	Mean
—	0.301	0.176	0.125	0.097	0.079	0.067	0.058	0.051	0.046	3.441
0.120	0.114	0.109	0.104	0.100	0.097	0.093	0.090	0.088	0.085	4.187

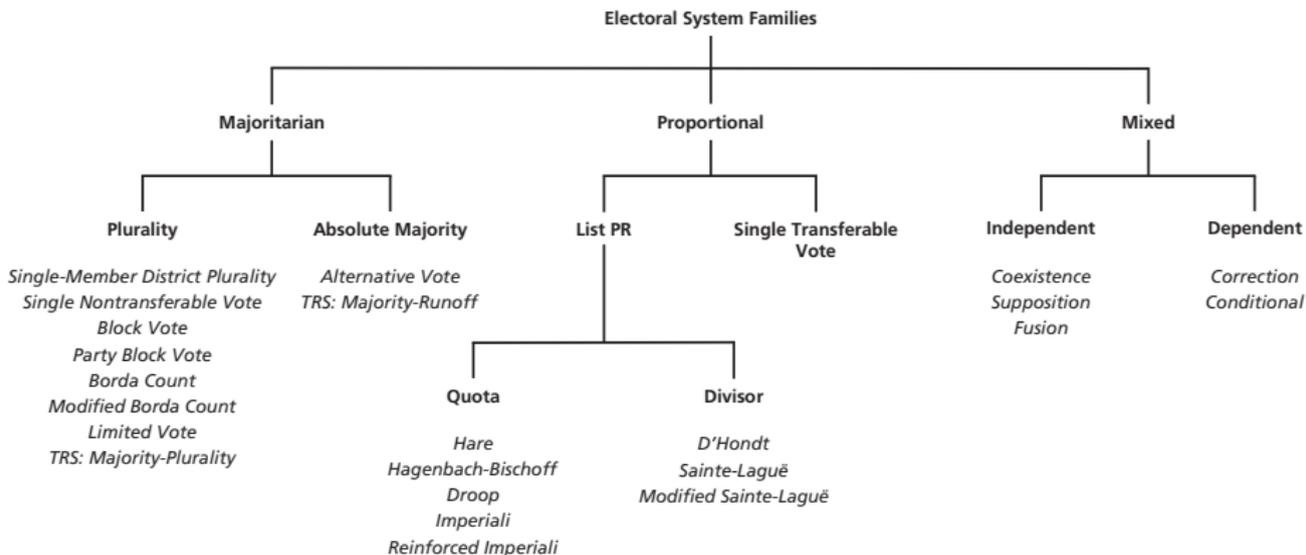

Political scientists typically distinguish between electoral systems based on their electoral formula.

1. Majoritarian
2. Proportional
3. Mixed

An **electoral formula** determines how votes are translated into seats.

FIGURE 13.3

Electoral System Families

A **majoritarian electoral system** is one in which the candidates or parties that receive the most votes wins.

A **single-member district plurality system (SMDP)** is one in which individuals cast a single vote for a candidate in a single-member district.

The candidate with the most votes wins.

TABLE 13.2**Election Results from the Bath Constituency,
UK Legislative Elections, 2015**

Candidate	Party	Votes	Percentage
Ben Howlett	Conservative	17,833	37.8
Steve Bradley	Liberal Democrat	14,000	29.7
Ollie Middleton	Labour	6,216	13.2
Dominic Tristram	Green	5,634	11.9
Julian Deverell	UKIP	2,922	6.2
Lorraine Morgan-Brinkhurst	Independent	499	1.1
Jenny Knight	Independent	63	0.1

The **single nontransferable vote (SNTV)** is a system in which voters cast a single candidate-centered vote in a *multimember* district.

The candidates with the highest number of votes are elected.

Whereas SMDP and SNTV are 'plurality' majoritarian electoral systems, the **alternative vote** is an 'absolute majority' majoritarian system.

The **alternative vote (AV)** is a candidate-centered preference voting system used in single-member districts where voters rank order the candidates.

If a candidate wins an absolute majority of first-preference votes, she is immediately elected.

If no candidate wins an absolute majority, then the candidate with the fewest first-preference votes is eliminated, and her votes are reallocated among the remaining candidates based on the designated second preferences.

This process is repeated until one candidate has obtained an absolute majority of the votes cast (**full preferential system**) or an absolute majority of the valid votes remaining (**optional preferential system**).

- 3 CAMERON, L
- 1** **SOUTHWICK, David** (Liberal)
- 4 BEALE, C
- 7 DANBY, M
- 2 JACKEL, G
- 8 ISHERWOOD, A
- 5 HORIN, L
- 6 LEWIS, J

DAVID
SOUTHWICK
MELBOURNE PORTS

The majority-runoff two-round system (TRS) is another 'absolute majority' majoritarian electoral system.

In a **majority-runoff TRS** voters cast a single candidate-centered vote in a single-member district.

Any candidate who obtains an absolute majority in the first round of elections is elected.

If no one obtains an absolute majority, then the top two vote winners go on to compete in a runoff election in the second round.

TABLE 13.4**Burkina Faso Presidential Elections 2015**

First round		
Candidate	Party	Vote share (%)
Roch Christian Kaboré	People's Movement for Progress	53.49
Zéphirin Diabré	Union for Progress and Reform	29.65
Tahirou Barry	National Rebirth Party	3.09
Bénéwendé Stanislas Sankara	Union for Rebirth	2.77

A **proportional**, or **proportional representation (PR)**, **electoral system** is a quota- or divisor-based electoral system employed in multimember districts.

The rationale behind PR systems is to produce a proportional translation of votes into seats.

Proportional representation (PR) electoral systems come in two main types:

1. List proportional representation systems (List PR)
2. Single transferable vote (STV)

In a **list PR system**, each party presents a list of candidates to voters in each multimember district.

Parties receive seats in proportion to their overall share of the votes.

These seats are then allocated among the candidates on their list in various ways.

List PR systems differ in important ways:

1. The precise formula for allocating seats to parties
2. The district magnitude
3. The use of electoral thresholds
4. The type of party list employed

All PR systems employ either quotas or divisors to allocate seats to parties.

A **quota** is essentially the 'price' in terms of votes that a party must 'pay' to guarantee themselves a seat in a particular electoral district.

A quota, $Q(n)$, is calculated as

$$Q(n) = \frac{V_d}{M_d + n}$$

- V_d is the number of valid votes in district d .
- M_d is the district magnitude or number of available seats in district d .
- n is the modifier of the quota.

A quota, $Q(n)$, is calculated as

$$Q(n) = \frac{V_d}{M_d + n}$$

- **Hare quota:** $n = 0$.
- **Hagenbach-Bischoff quota:** $n = 1$.
- **Imperiali quota:** $n = 2$.
- **Reinforced imperiali quota:** $n = 3$.
- The **Droop quota** is the same as the Hagenbach-Bischoff quota plus 1.

TABLE 13.6**Allocating Seats to Parties Using the Hare Quota**

	Party A	Party B	Party C	Party D	Party E	Party F	Total
Votes	47,000	16,000	15,800	12,000	6,100	3,100	100,000
Seats							10
Quota							10,000
Votes ÷ Quota	4.7	1.6	1.58	1.2	0.61	0.31	
Automatic seats	4	1	1	1	0	0	7
Remainder seats							3

TABLE 13.6**Allocating Seats to Parties Using the Hare Quota**

	Party A	Party B	Party C	Party D	Party E	Party F	Total
Votes	47,000	16,000	15,800	12,000	6,100	3,100	100,000
Seats							10
Quota							10,000
Votes ÷ Quota	4.7	1.6	1.58	1.2	0.61	0.31	
Automatic seats	4	1	1	1	0	0	7
Remainder seats							3

What about the 'remainder' seats?

The most common method for allocating the remainder seats is the **largest remainder method**.

TABLE 13.7

Allocating Seats to Parties Using the Hare Quota with Largest Remainders

	Party A	Party B	Party C	Party D	Party E	Party F	Total
Votes	47,000	16,000	15,800	12,000	6,100	3,100	100,000
Seats							10
Quota							10,000
Votes ÷ Quota	4.7	1.6	1.58	1.2	0.61	0.31	
Automatic seats	4	1	1	1	0	0	7
Remainder	0.7	0.6	0.58	0.2	0.61	0.31	
Remainder seats	1	1	0	0	1	0	3
Total seats	5	2	1	1	1	0	10

A **divisor**, or **highest average, system** divides the total number of votes won by each party in a district by a series of numbers (divisors) to obtain quotients.

District seats are then allocated according to which parties have the highest quotients.

The three most common divisor systems are:

- **D'Hondt:** 1, 2, 3, 4, ...
- **Sainte-Laguë:** 1, 3, 5, 7, ...
- **Modified Sainte-Laguë:** 1.4, 3, 5, 7, ...

TABLE 13.8**Allocating Seats to Parties Using the d'Hondt System**

	Party A	Party B	Party C	Party D	Party E	Party F	Total
Votes	47,000	16,000	15,800	12,000	6,100	3,100	100,000
Seats							10
Votes ÷ 1	47,000 (1)	16,000 (3)	15,800 (4)	12,000 (6)	6,100	3,100	
Votes ÷ 2	23,500 (2)	8,000 (9)	7,900 (10)	6,000	3,050	1,550	
Votes ÷ 3	15,666 (5)	5,333	5,266	4,000	2,033	1,033	
Votes ÷ 4	11,750 (7)	4,000	3,950	3,000	1,525	775	
Votes ÷ 5	9,400 (8)	3,200	3,160	2,400	1,220	620	
Votes ÷ 6	7,833	2,667	2,633	2,000	1,017	517	
Total seats	5	2	2	1	0	0	10

The key factor influencing the proportionality of an electoral system is the district magnitude.

District magnitude refers to the number of representatives elected in a district.

The larger the district magnitude, the greater the degree of proportionality.

There is considerable variation in the district magnitude across countries.

In 2006 and 2007, Ukraine had a district magnitude of 450.

Serbia currently has a district magnitude of 250.

Historically, Chile has had a district magnitude of 2.

All proportional electoral systems have an electoral threshold.

An **electoral threshold** is the minimum level of support a party needs to obtain representation.

A **natural threshold** is a mathematical by-product of the electoral system.

A **formal threshold** is explicitly written into the electoral law.

Electoral system proportionality is low when the electoral threshold is high.

Electoral thresholds can have negative side-effects.

- In Turkey 2002, so many parties failed to surpass the 10% threshold that fully 46% of all votes were wasted.
- In Poland 1993, 34% of the votes were wasted, allowing the former Communists to return to power.

In a **closed party list**, the order of candidates elected is determined by the party itself, and voters are not able to express a preference for a particular candidate.

In an **open party list**, voters can indicate not just their preferred party, but also their favored candidate within that party.

In a **free party list**, voters have multiple votes that they can allocate either within a single party list or across different party lists.

The only proportional electoral system that does not employ a party list is the single transferable vote.

The **single transferable vote (STV)** is a candidate-centered preferential voting system used in multimember districts.

In STV systems, candidates that surpass a specified quota of first-preference votes are immediately elected.

In successive counts, voters from eliminated candidates and surplus votes from elected candidates are reallocated to the remaining candidates until all of the seats are filled.

STV systems, click [▶ here](#)

Australian elections, click [▶ here](#)

STV example

- District magnitude is 3.
- 20 voters.
- 5 candidates: Bruce, Shane, Sheila, Glen, and Ella.
- Droop quota: $\lceil 20 / (3 + 1) \rceil + 1 = 6$

TABLE 13.9**Results from Twenty Ballots in an STV Election**

Voting round						
1st	Bruce	Shane	Sheila	Sheila	Glen	Ella
2nd		Shane	Glen	Ella		
3rd			Ella	Glen		

TABLE 13.10
The STV in a Three-Seat District with Twenty Voters

Voting round	Candidates					Result
	Bruce	Shane	Sheila	Glen	Ella	
1st						Sheila is elected, and Sheila's surplus votes are reallocated
2nd						Shane is eliminated
3rd						Bruce is elected
4th						Ella is eliminated, and Glen is elected

A **mixed electoral system** is one in which voters elect representatives through two different systems, one majoritarian and one proportional.

Most mixed systems employ multiple **electoral tiers**.

An **electoral tier** is a level at which votes are translated into seats.

The lowest electoral tier is the district or constituency level. Higher tiers are constituted by grouping together different lower-tier constituencies, typically at the regional or national level.

In a mixed system, it is often the case that a majoritarian system is used in the lowest tier (district level) and a proportional system is used in the upper tier (regional or national level).

There are two basic types of mixed systems.

1. An **independent mixed electoral system** is one in which the majoritarian and proportional components of the electoral system are implemented independently of one another.
2. A **dependent mixed electoral system** is one in which the application of the proportional formula is dependent on the distribution of seats or votes produced by the majoritarian formula.

TABLE 13.11**Translating Votes into Seats in an Independent Mixed Electoral System**

	Votes won in each electoral district					National district votes won	Seats won			
	1	2	3	4	5		% of votes won	SMDP	List PR	Total
Party A	3,000	3,000	3,000	3,000	3,000	15,000	60	5	3	8
Party B	2,000	2,000	2,000	2,000	2,000	10,000	40	0	2	2
Total	5,000	5,000	5,000	5,000	5,000	25,000	100	5	5	10

In most dependent mixed systems, individuals have two votes.

- One vote is for the representative at the district level (candidate vote).
- One vote is for the party list in the higher electoral tier (party vote).

FIGURE 13.7

A Sample Ballot Used in New Zealand's Dependent Mixed Electoral System

OFFICIAL MARK

00000

YOU HAVE 2 VOTES

PARTY VOTE

Explanation
This vote decides the share of seats which each of the parties listed below will have in Parliament. Vote by putting a tick in the circle immediately after the party you choose.

Vote for only one party

	LABOUR PARTY	<input checked="" type="checkbox"/>
	ALLIANCE	<input type="checkbox"/>
	McGILLCUDDY SERIOUS	<input type="checkbox"/>
	ACT NEW ZEALAND	<input type="checkbox"/>
	NATURAL LAW PARTY	<input type="checkbox"/>
	NZ NATIONAL PARTY	<input type="checkbox"/>
	NEW ZEALAND FIRST PARTY	<input type="checkbox"/>
	NZ CONSERVATIVE PARTY	<input type="checkbox"/>
	ADVANCE NZ	<input type="checkbox"/>
	ANIMALS FIRST	<input type="checkbox"/>
	AOTEAROA LEGALISE CANNABIS PARTY	<input type="checkbox"/>
	ASIA PACIFIC UNITED PARTY	<input type="checkbox"/>
	CHRISTIAN COALITION	<input type="checkbox"/>
	ETHNIC MINORITY PARTY	<input type="checkbox"/>
	GREEN SOCIETY	<input type="checkbox"/>
	MĀORI MOVEMENT	<input type="checkbox"/>
	NZ SUPERANNUITANTS AND YOUTH ACTION	<input type="checkbox"/>
	PROGRESSIVE GREENS	<input type="checkbox"/>
	TE TAWHĀRAU	<input type="checkbox"/>
	THE LIBERTARIANS	<input type="checkbox"/>
	UNITED NEW ZEALAND PARTY	<input type="checkbox"/>

ELECTORATE VOTE

Explanation
This vote decides the candidate who will be elected Member of Parliament for the TAUPŪ ELECTORATE. Vote by putting a tick in the circle immediately before the candidate you choose.

Vote for only one candidate

	BURTON, Mark	<input checked="" type="checkbox"/>
	CADMAN, Sheryl	<input type="checkbox"/>
	DICK, David	<input type="checkbox"/>
	DIXON, Adrian	<input type="checkbox"/>
	FLYNN, Jan	<input type="checkbox"/>
	McCARTHY, John	<input type="checkbox"/>
	PETERS, Jan	<input type="checkbox"/>
	VINCIGUERRA, Peter	<input type="checkbox"/>
