		Effect of Regime Type on Democratic Survival, 1946–1990
TABLE 16.9		

	Dependent variable: Probability that a country will be a democracy this year if it was a democracy last year	
Independent variables	Model 1	Model 2
Presidentialism	−0.58***	−0.32*
	(0.14)	(0.16)
GDP per capita		0.0002***
		(0.00005)
Growth in GDP per capita		0.04***
		(0.01)
Oil producer		−0.12
		(0.28)
Constant	2.22***	1.29***
	(0.10)	(0.18)
Number of observations	1,584	1,576
Log-likelihood	−170.85	−142.15

*$p < 0.10$; **$p < 0.05$; ***$p < 0.01$
